This group of islands is the most interesting of any in Microuesia, its population being about 4,000. The natives are a fine-featured, pleasant people, and though living on low coral islands have good voices and sing well. The first three teachers were landed here by the Morning Star in the beginning of 1874, who were from Mr Starges' school in Bonsbe. The natives received them gladly, and promised to build them houses and churches, and furnish their fool, which promise they more than fulfilled, for they gave them each a nice large cance besides. Last year the Star landed here two teachers with their wives, and this year two more, so that they now have seven teachers, which is a full supply for this group; two of them are ordained. There are between three and four hundred members, in all, connected with the different churches,—all this in about four years. The hand of God is indeed manifest in this good work

Lauded the missionaries and lay off and on while they did their work; at 5 p m on the 27th left Pingalap, and next day was at Mogil. Left the same evening and arrived at Benate on the 29th, having been absent 24 days. Remained here 8 days, taking in wood, water, yams, and prepared the Star for the passage home. Mr. Hains and family came on board, and on Monday, Jan 7, 1878, we set sail for Honolulu. Passed out of the northwest passage and at noon spoke the whaling bark Norman of New Bedford '31 days from Honolulu.

The winds and currents in the Gilbert Islands were entirely changed this year (1877) from their usual course, at least the oldest trader here says that for fifteen years he has not seen so much westerly winds or rain, and the currents which have usually been westerly were this year 1½ to 2 knots easterly. Through the Marshall and Caroline Islands found no current this year; usually the current amongst
